

# ARITHMETIC SEQUENCE

## Percentage Time analysis

$M_1 D_1 H_1 = M_2 D_2 H_2$       8 men      7 days      10 hr

(D2)

$5 \cdot 10 \cdot 9 = 8 \cdot D_2 \cdot 10$

$\frac{5 \cdot 10 \cdot 9}{8 \cdot 10} = \frac{45}{8} = 5 \frac{5}{8}$  days needed ..

40 people      7 days      10 hr/day      1/3 full  
 20 people      10 days      ?

$\frac{M_1 D_1 H_1}{W_1} = \frac{M_2 D_2 H_2}{W_2}$

A + B working together ..

A → Some work      B → Rest of the work.

A can do in x days → Together (~~x+y~~) days ??  
 B can do in y days →  $\left(\frac{xy}{x+y}\right)$  days  
 (5) (7)       $\frac{5 \cdot 7}{5+7} \rightarrow \left(\frac{35}{12}\right)$        ~~$\frac{2xy}{x+y}$~~

# (A+B) → 2 days

A alone → y days

B alone →  $\left(\frac{xy}{y-x}\right)$

Top formula ..

# A → x } find work in how many days ??  
 B → y }  
 C → z }

$\frac{xyz}{(xy+yz+zx)}$

x1x2 x3x4

(x+y)ct (x)

# A, B, C, D  
 $\frac{1}{x_1}, \frac{1}{x_2}, \frac{1}{x_3}, \frac{1}{x_4}$  days

$$\frac{x_1 x_2 x_3 x_4}{(x_1 x_2 x_3 + x_1 x_2 x_4 + x_1 x_3 x_4 + x_2 x_3 x_4)}$$

# A+B → x days  
 B+C → y days  
 C+A → z days

A+B+C →  $\left( \frac{2xy + 2yz + 2zx}{xy + yz + zx} \right)$

Can finish the work in days..

den men x, y, z..

Structure

① Summary Day 1 Heavy

① male ② female

men ⑦  
 female ⑩ ✓

high value → low efficiency..

Here we can't judge efficiency properly  
 can't go to quality..

A 100 10  
 B (w) 4 ✓

② Don't judge only respect to quality..

Wages → Salary..

① → 3 days }  
 ② → 10 days } ✓

R → 60  
 Ra → 45  
 Fa → 70

(B) → (odms) ✓

$$30 \left| \begin{array}{l} 60, 45, 30 \\ \hline 2, 45, 1 \end{array} \right.$$

~~60:45:30~~

Wages Ratio →  $\frac{1}{60} : \frac{1}{45} : \frac{1}{30}$

→  $\frac{2700}{60} : \frac{2700}{45} : \frac{2700}{30}$

→ 45 : 60 : 90

→ 3:4:6

# Tank filling...

$h_1 > h_2$   
10 hr      6 hr

#  $h_1 < h_2 < h_3 < h_4$

(h1) is the most efficient...

Both pipe together →  $\frac{p_1 p_2}{k_1 + k_2}$

total time needed for filling:

$$\frac{M_1 D_1 H_1}{W_1} = \frac{M_2 D_2 H_2}{W_2}$$

A pipe can fill  $\rightarrow 12$  hr.

Leakage in the bottom for that reason  $\rightarrow 24$  hr.

If for the full tank the in-pipe is stopped then how long it will take to empty it?

$$\frac{12 \times 24}{24 - 12} = \frac{12 \cdot 24}{12} = \underline{\underline{24 \text{ hr}}}$$

1. A can do a work in 15 days and B in 20 days. If they work on it together for 4 days, then the fraction of the work that is left is :

- ~~1/4~~
- ~~1/10~~
- ~~7/15~~
- ~~8/15~~

④  $7/2$   
⑤  $1/2$

$0.15$   $0.50$  left

A+B  $\rightarrow 4$  days.

$$A+B \rightarrow \left(\frac{1}{15} + \frac{1}{20}\right) = \frac{7}{60}$$

Done 4 days  $\rightarrow$

$$\left(1 - \frac{7}{15}\right) = \frac{8}{15}$$

A+B+C =  $\frac{1}{4}$  C in 1 day

$$A \rightarrow \frac{1}{16}$$

$$B \rightarrow \frac{1}{12}$$

$$\frac{1}{4} - \frac{1}{16} - \frac{1}{12} = \frac{5}{48}$$

2. A can lay railway track between two given stations in 16 days and B can do the same job in 12 days. With help of C, they did the job in 4 days only. Then, C alone can do the job in:

- 9 1 days  $9 \frac{1}{5}$
- 9 2 days  $9 \frac{2}{5}$
- 9 3 days  $9 \frac{3}{5}$  ✓
- 5
- 10

C can do  $\rightarrow 5/48 \rightarrow 9 \frac{1}{5}$

3. A, B and C can do a piece of work in 20, 30 and 60 days respectively. In how many days can A do the work if he is assisted by B and C on every third day?

- ~~12 days~~
- 15 days
- 16 days
- 18 days

A  $\rightarrow 1 \rightarrow \frac{1}{20}$

A  $\rightarrow 2 \rightarrow \frac{2}{20} + \frac{1}{10}$  done

left  $\rightarrow 1 - \frac{1}{10} = \frac{9}{10}$

4. A is thrice as good as workman as B and therefore is able to finish a job in 60 days less than B. Working together, they can do it in:

- ~~20 days~~
- ~~22 1/2 days~~
- 25 days ✓
- 30 days ✓

A+B+C  $\rightarrow \frac{1}{20} + \frac{1}{30} + \frac{1}{60} = \frac{1}{10}$

3 days  $\rightarrow \frac{3}{10} + \frac{1}{10} = \frac{2}{10} = \frac{1}{5}$

5. A alone can do a piece of work in 6 days and B alone in 8 days. A and B undertook to do it for Rs. 3200. With the help of C, they completed the work in 3 days. How much is to be paid to C?

- Rs. 375
- Rs. 400
- Rs. 600
- Rs. 800

$\frac{1}{5}$  work is done in 3 days

20% work  $\rightarrow 3$  days

100%  $\rightarrow 6$

60%  $\rightarrow 9$

④ A:B = 1:3 time

diff  $\rightarrow (3-1) = 2$  days

(4)

A: B  
diff  $\rightarrow (3-1) = 2$  days

B  $\rightarrow$  3 days    A  $\rightarrow$  1 day

diff. 2 days  $\rightarrow$  B  $\rightarrow$  3 days  
diff 60  $\rightarrow$  B  $\rightarrow$   $\frac{3}{2} \times 60 = 90$  days

100%  $\rightarrow$  6

60%  $\rightarrow$  9

80%  $\rightarrow$  12

100%  $\rightarrow$  15

If B  $\rightarrow$  90 days  $\rightarrow$  A  $\rightarrow$  30 days  
A  $\rightarrow \frac{1}{30}$     B  $\rightarrow \frac{1}{90}$

$$\frac{A+B}{\frac{1}{30} + \frac{1}{90}} = \frac{4}{90} = \left(\frac{2}{45}\right)$$

30 days total  
1 day  $\rightarrow \frac{1}{30}$

(2)

$\frac{1}{2}$

1 day  $\rightarrow \frac{2}{45}$   
full room  $\rightarrow \frac{45}{2} \rightarrow 22 \frac{1}{2}$  days
