- Python
- Data structure & algorithm
- AI
- AI application

Python:

- 1) Simple / Beginners' language
- 2) Interpreter based (Codes ==set of instructions === interpreter of ML
====entire programme == instruction to Machine Language=== perform the task)
- 3) Interactive (user & Python: continuous process)
- 4) GUI : Graphical User Interface
- 5) Cross-platform Language

Application:

- 1) Artificial Intelligence (AI tools)
- 2) Programming for games
- 3) Audio and Video applications
- 4) CAD application (Fandango)
